PREVENTATIVE MAINTENANCE

“Preserving the integrity of your security is our priority.”

For over 30 years, Imperial Security & Fire has been providing security solutions to both Residential and Commercial clients across Sydney. With our trained staff and strong industry ties, we are dedicated to providing our clients with a level of service and support that exceeds expectations and maximises security requirements. As a Platinum ASIAL member & Sydney's leading electronic security provider, we're ready to show you a level of service you deserve.

Did you know that Imperial Security Solutions also offers comprehensive **PREVENTATIVE MAINTENANCE** plans, providing you with a cost effective service plan to ensure that your onsite security equipment is always functioning at its peak.

WHAT IS A PREVENTATIVE MAINTENANCE PLAN?

Your security is paramount. Like all electronic equipment, your electronic security equipment (CCTV, Alarm Systems & Access Control) requires maintenance to make certain you're continually protected.

In most cases, when problems with your electronic security equipment occur, this results in the need for service calls & interim downtime for your onsite security until the problem is resolved. At Imperial Security & Fire, our aim is to resolve problems as quickly and cost effectively as possible, reducing downtime & providing you with continued protection.

A **Preventative Maintenance Plan** is regular and routine service of your security equipment, providing you with the peace of mind that your security equipment is operating effectively. With regular and routine maintenance by our trained technicians, problems are often discovered ahead of time with same day resolution. From general cleaning to software/firmware upgrades & Remote Management, we're ready to build a Preventative Maintenance Plan that best suits your onsite security requirements.

PREVENTATIVE MAINTENANCE PLANS TAILORED FOR YOU

From SMEs to large organisations with 250+ employees, Imperial Security & Fire can tailor a Preventative Maintenance Plan to benefit your business, allowing for visits that meet your timeline. In consultation with you, we design cost-effective plans to meet your budget while preserving the integrity of your onsite security. Most importantly, our **Preventative Maintenance Plans** provide your investment with reliability; minimizing downtime and keeping you secure.
